## MANUAL RX MULTI 433 TO 868 MHz

## 1. RX Multi drawing

## 2. Brand selector

With the 8 DIPs selector, the user can make different combinations for different remote brands. The brands selection is shown below in table 1.

## 3. Learn Button and LED

In RX Multi receiver, there are 2 independent channels. Each channel has independent learn button S1 and S2, and their corresponding LEDs L1 and L2. This receiver can memorize up to 250 remotes per channel.

- Channel 1 and 2 are set as monostable, the output is activated for 3 seconds.

## 4. Power Input Selector

The RX Multi can work at input AC/DC $9 \mathrm{~V} \sim 30 \mathrm{~V}$. However, it's better to change the jumper according to the power supply. If the input is over 24 V , shorten pin $2 \& 3$; shorten $1 \& 2$ if input is less than 24 V (See image from section 8).

## 5. Exchangeable Memory Card

The memory card can be removed from the board to be inserted in a different receiver; this way the user can preserve all the remotes learned in the memory card. See image from section 8 .

## 6. Programming one button or remote:

1. First, select the DIPs combination of the chosen remote's brand that will be programmed following table 1.
2. Press the learn button (S1 or S2), the corresponding LED turns on.
3. Press the button of the remote you want to programme, the LED L1 or L2 flashes for 5 seconds, this shows remote button entered the RX Multi successfully.

Repeat steps 2 and 3 for another button or remote.

## 7. Erase all data in memory card:

By pressing for few seconds the button S1 or S2, the LED will be fixed. Keep pressing this button until the LED turns off. All data in the memory card will be erased permanently.

NOTICE: Be careful at erasing all data in the memory card. The data will be erased permanently and CANNOT be recovered.

## 8. Details picture

Location of LEDs, buttons, DIP selector, memory card and jumper.

NOTE: To programme a FAAC remote in the RX MULTI please follow the next steps:
$1 \cdots$ Press at the same time channels 2 and 3 on the FAAC remote, the remote LED will start flashing. 2" Press in the RX MULTI the channel where you want programme the remote. The LED stays fixed.
3." Press several times the button of the FAAC remote you want to programme.
